SOFTWARE UPGRADE PROCEDURE

REL 2.1 SEP. 2016

MAX SOFTWARE UPGRADE PROCEDURE

The DTS USB to DMX software upgrade interface let you upgrade the internal software on MAX and other D.T.S. units

Installing Device Software and drivers

Save the compressed folder "DTS Firmware upgrade utility 2.02 zip" on a Windows Based computer and extract it.

Open the folder and double click on setup.exe

Click on Next button (Target directory for application and Target directory for National instrument software)

Click on Next button to begin installation

Click on Next button to finish the software installation and to install the FTDI CDM Drivers.

Press OK button to finish

Be sure that internal switch on "DTS USB to DMX interface" is set to COM

Internal switch on "DTS USB to DMX interface" must be placed on COM side

DMX / COM

Connect the UNIT DMX input to the USB interface DMX OUTPUT with a standard DMX CABLE

THE UNIT MUST BE OFF

Double click on "DTS Firmware Upgrade utility icon" on computer desktop to launch the software

Enter the file path in the combo-box

("C:\Desktop\MAX_FPR_Rev.9M0rev54_9M1rev39_PTrev50.DTS" in the example below) or browse to it by clicking the browse button and search for the MAX software release

Press "Send Upgrade" button.

NOW TURN ON THE UNIT

DTS Firmware upgrade utility will start to transfer the new software on MAX unit.

At the end of the procedure, the unit will reset.

Now the unit is upgraded with new software release.
